

Hamerlinck, G., Lemoine, N. P., Hood, G. R., Abbott, K. C. and Forbes, A. A. 2016. Meek mothers with powerful daughters: effects of novel host environments and small trait differences on parasitoid competition. – Oikos doi: 10.1111/oik.02701

Appendix

Figure A1. Body size scales with ovipositor length across lineages of *Diachasma alloenum*. (A) Blueberry-associated *D. alloenum* dissected ovipositor lengths are positively correlated with thorax length ($p < 0.001$; $R^2 = 0.67$). (B) Hawthorn-associated *D. alloenum* ovipositor measurements are also positively correlated with thorax length ($p < 0.001$, $R^2 = 0.69$).
