

Xiao, S., Atwater, D. Z. and Callaway, R. M. 2019. Integrating spatial structure and interspecific and intraspecific plant–soil feedback effects and responses into community structure. – Oikos doi: 10.1111/oik.05915

Appendix 1

Table 1. RII values of plant soil feedback that come from the pairwise experiments among five species. Each RII value represents plant soil feedback when species at different row grew in the soil of species at different column.

	<i>P. arguta</i>	<i>D. fruiticosa</i>	<i>P. gracilis</i>	<i>P. recta</i>	<i>F. idahoensis</i>
<i>P. arguta</i>	-0.110	0.071	-0.072	-0.263	0.040
<i>D. fruiticosa</i>	-0.230	0.055	0.058	-0.356	0.152
<i>P. gracilis</i>	-0.315	-0.037	0.088	-0.392	0.059
<i>P. recta</i>	0.249	0.214	-0.097	-0.208	0.052
