

Meineri, E., Klanderud, K., Guittar, J., Goldberg, D. E. and Vandvik, V. 2019. Functional traits, not productivity, predict alpine plant community openness to seedling recruitment under climatic warming. – Oikos doi: 10.1111/oik.06243

## Appendix 1

Seedling emergence non-responses to vascular plant biomass (a), bryophyte biomass (b) and SLA (c).  $\Delta$ seedling emergence (#): differences in seedling emergence between warmer- and colder-climate communities in number of seedlings.;  $\Delta$ vascular plant biomass,  $\Delta$ bryophyte biomass and  $\Delta$ SLA: differences in these community characteristics between warmer- and colder-climate communities.
